RY. is a constitutional disease, a corruption of the blood, by which this fluid becomes vitinted weak, and poor. Being in the circulation, is pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and fifthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon

will visit the iniquities of the fathers upon their children." Its effects commence by deposition from the Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or zores. This foul corruption, which genders in the blood, depresses the onergies of life, so that scrofulous constitutions not only suffer from scrofulous com-plaints, but they have far less power to with-stand the attacks of other diseases; consestand the attacks of other diseases; consequently vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this acrofulous contamination; and many destructive diseases of the liver, kinkeys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous:

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every-where prevailing and fittal malady. It is com-bined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. System from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as EMUPTIVE and SKIN DISEASES, ST. ANYHONY'S FIRE, ROSE, OF ERYSIPELAS, PIMPLES, PCSTULES, BLOTCHES, BLAINS and BOHA, TUMORS, TETTER and SALT RIBUM, SOALD HEAD, RINGWORM, RICHMATISM, SYPHILITIC and MERCURIAL DISEASES. DROPEY, DYSPESSIA, DEBILITY, and LASES. DROPSY, DYSPEYSIA, DEBLETY, and, indeed, ALL COMPLAINTS ARISING FROM VITIA-TED On INTURE BLOOD. The popular belief in "impurity of the blood" is founded in trath, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sersaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in contaminated constitutions.

WHAT THE

Leading Newspapers of Ohio Say.

From Sc Cleveland Herald of March 23.

The orthography of the Worester Dictionary is that used by most, if not all, authors of distinction in this country and England, and conforms to the general usage of ordinary writers and speakers.

Whatever prejudices may have existed previously, a careful study of this volume will invariably be followed by a wars appreciation of its great merits, and a desire to add it to the well selected library, be it large or small. It is library in itself, and will remain an imperiable ble record of the learning of its compiler.

pitation, Paintal Affection of the Spicen, Hysterics, Pain in the Bowels, Colle, Paralysis and Devangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "Cone" expels the poison from the blood, and consequently cures them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while exposed to the infection, that will be exercised from the system, and cannot accumulate in sufficient quantity to ripen into discase. Hence it is even more valuable for protection than cure, and few will ever suffer from Intermittents if they avail themselves of the protection this remedy affords.
